

Bringing eye care and eyewear to you

Vision care delivered right to your door

Convenience is what our Pop-up Clinic is all about; it's a fully-equipped vision clinic right in your own facility. No need for employees to leave the office. No extra commutes. No hassle finding a time that fits everyone's schedule.

EMPLOYEES CAN:

Receive an eye exam. More than a basic screening; this is a comprehensive exam by an in-network optometrist. The technology they use can help identify even the slightest vision issue or early sign of some serious health conditions.

Shop the latest styles. Every employee is welcome to browse the on-site frame store – even if they don't get an eye exam or aren't enrolled. They can choose from hundreds of brand name frames and sunglasses, then easily apply their benefits and discounts at checkout (many frames may be 100% covered by the benefit allowance).

YOU SUPPLY THE FOLLOWING, WE'LL TAKE CARE OF THE REST:

- 2 rooms (each 300 sq ft minimum), both rooms must be lockable
- Exam room must be private due to PHI/HIPAA requirements
- Additional storage space for equipment crates (if frame and exam room are over 300 sq ft, we can store crates within these rooms)
- Access to electricity and a strong WiFi connection (hard-wired preferred)
- Commitment to promote the event to your employees

Make eye care more convenient than ever –
